

MEET BANGLADESH EXPOSITION

24-25 April 2025 ICCB, Kuril, Dhaka, Bangladesh

EXHIBITOR CATALOGUE

EXHIBITOR CATALOGUE

Bangladesh is expanding its export portfolio by focusing on several high-demand sectors, leveraging its competitive advantages in the global marketplace. These sectors include MPPE, Leather & Leather Goods, Footwear (both leather and non-leather), Plastic and Light Engineering (including Electronics, Electrical Goods, Bicycle, Automobile, Accumulators, Battery, etc).

The Ministry of Commerce has placed strategic emphasis on these industries and has set an ambitious target of achieving USD 80 billion in exports by 2024. This initiative aims to enhance export competitiveness, attract investment, and generate employment. By diversifying beyond the dominant Ready-Made Garments (RMG) sector, the project seeks to bolster Bangladesh's export revenue sustainably, reduce dependence on any single industry, and enhance economic resilience against global economic fluctuations.

About the EC4J Project

The Export Competitiveness for Jobs (EC4J) is a flagship project of the Ministry of Commerce financed by the World Bank Group.

The development objective of the EC4J project is to contribute to economic diversification of Bangladesh by improving competitiveness and increasing investment in high-potential sector(s) with a consequential positive impact on trade, export, and employment through different interventions in targeted sectors such as Leather & Leather Goods, Footwear (leather & non-leather), Plastics and Light Engineering (Electronics, Electrical Goods, Bicycle, Automobile, Accumulators, Battery, etc.).

These sectors are selected based on the priority of Government of Bangladesh, particularly its Export Policy as well as the priorities highlighted in the 7th Five Year Plan. Improving the competitiveness of these established, less dominant but promising sectors is likely to be the main source of economic diversification; hence require favorable business environment and institutional support for improving competitiveness in order to have better access to international markets and sustain the growth.

The project has four components, while component one will mainly address Environmental, Social and Quality (ESQ) Compliance of the targeted sectors by creating ESQ awareness at sector level, providing as matching grants under Export Readiness Fund (ERF) program to address ESQ focusing on MSMEs factories.

Besides, under this component, EC4J project will undertake targeted and strategic drive to harness market opportunities utilizing state-of-the-art marketing and communication tools and mediums coupled with adequate market intelligence.

Under the component two - Four world class Technology Centre are being established which will enable improved access to modern technology and process, skills manpower and management capabilities.

Under component three, the project also will invest in construction of Public facilities to bridging the gaps in common infrastructure such as recycling, storage facilities, utility facilities, connections, connecting roads etc. Component four is the project implementation unit to manage the overall activities and implementation of the EC4J project.

It is expected that all of the above interventions will attract private investment, promote trade and export and stimulate MSMEs growth. Ultimately, highly contribute to achieve diversified and exponential exports growth and create 90000 more and decent jobs.

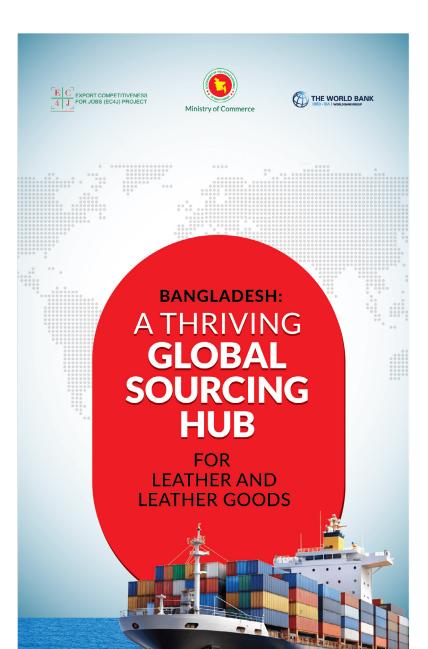

In brief the EC4J project aims to improve ESQ compliance standards and branding Bangladesh as preferred and attractive sourcing destination. Enabling access to modern technologies, enhancing common infrastructure in order to boost exports. We need support from all the stakeholders.

All kind of leather goods. ex. bags, wallets, belts, shoes (upcoming)

Company Profile

Urbaland was founded in 2021, starting with money bags and a few leather accessories. By 2025, it has grown into one of the leading online retailers of leather goods, dominating the market in bags, belts, and other leather products.

In addition to serving customers locally, we successfully expanded into international markets by exporting to the USA with manufacturing support from a partner in Uttar Pradesh, India. We have also established a strong presence in corporate orders, collaborating with esteemed brands such as UCB Bank, G&G, the ICT Division, and several other government and private organizations.

Looking ahead, our vision is to launch a USA-based brand that showcases our locally crafted, export-quality leather goods. We aim to manage retail sales directly from the USA, bringing the finest craftsmanship from our country to a global audience.

Company Profile

AKIJ GROUP stands tall as one of Bangladesh's largest conglomerates, with a rich legacy spanning over half a century. Led by the visionary Sk. Akij Uddin, it has earned the esteem of being a confident and highly respected industrial family in Bangladesh. Originating as a modest jute trading entity over 50 years ago, AKIJ GROUP has evolved into a diversified power house. In 2003, Sk. Afil Uddin, the son of Sk. Akij Uddin, further expanded the family's legacy by establishing AFIL GROUP.

Since 2003 AFIL GROUP has been focused on maintaining QUALITY & SUSTAINABILITY throughout its diverse range of industries. Our work ethic is based on hard work and ensuring our product is always of the highest quality. We are also focused on an environmentally conscious approach within all of our industries and products. With over 10000 employees throughout AFIL GROUP's portfolio, including multiple industries consisting mainly of a female workforce, we strive to be a big contributor to the GDP, while also providing opportunities for everyone.

Afil Footwear Industries Ltd. is a new company which will start with a capacity of 5000 pairs per day based on 1 shift of 8 hours each in 2 lines at a 100% capacity utilization; with a yearly production of approximately; 15,60,000 pairs. The total fixed cost of the project has been estimated at BDT 1000 Million. Afil Foowear Industries Ltd will be equipped with brand new machinery and latest technology.

Sports Shoes

Company Profile

Founded in 1989 by visionary architect Mr. M.A. Kalam, Excelsior Shoes Ltd. was born from a mission to generate employment—especially for underprivileged women—and contribute to Bangladesh's GDP through exports. Commercial production began in 1990, focusing on manufacturing sports shoes for globally renowned brands.

Equipped with state-of-the-art machinery and led by a skilled management team, Excelsior currently produces 250,000 pairs of shoes per month (on a single 8-hour shift). Expansion plans are underway to boost capacity to at least 400,000 pairs monthly, with increased floor space, additional lines, and updated machinery.

As part of the Excelsior Group, which also operates in the food and pharmaceutical sectors and runs an international trading house, Excelsior Shoes continues to uphold excellence in production and global partnerships.

Company Profile

Farsee is the only dedicated PPE Park in South Asia, covering over 25 acres and set to achieve Lead Platinum certification. With a US\$ 100 million investment in infrastructure and equipment, it features advanced manufacturing capabilities, including two ETO Sterile Units with a capacity of 110,000 units per day and various specialized machines for producing high-quality PPE products.

Beximco Health, the operator of Farsee, understands the need for certified protective clothing for workers in high-risk areas. With expertise in PPE manufacturing and a commitment to quality, Beximco Health offers large-scale production, fast delivery, and competitive pricing. They have established an End-to-End Testing Laboratory in partnership with Intertek, a globally accredited laboratory, to conduct all relevant PPE testing standards for the USA, EU, UK, and Asia in Bangladesh.

Beximco Health has rapidly added PPE manufacturing capabilities, producing gowns, masks, and coveralls to meet urgent demand during the global pandemic, showcasing its commitment to enhancing PPE supply both locally and globally.

Surgical Face Mask (Unisex, Female, Kids), KF94 Mask (Kids & Adult)

Company Profile

FM Plastic Industries PLC. is a leading manufacturer specializing in highquality plastic products and personal protective equipment (PPE). Since its establishment, the company has been committed to delivering innovative and reliable solutions that cater to the evolving needs of consumers and businesses alike.

In response to the COVID-19 pandemic, FM Plastic Industries PLC expanded its manufacturing capabilities to include protective face masks. Recognizing the growing demand for high-standard respiratory protection, the company introduced a range of surgical face masks and KF94 masks tailored for unisex, female, and kids consumers.

FM is focusing exclusively in high quality and cost-effective product development and implementation of services. We are advancing on a tremendous pace and with involvement of skilled and experienced people working in the organization.

FM Plastic Industries PLC has her own premise and the total area is around 60,000 square feet. The company is equipped with latest technological advancement associated with most modern equipment and machineries. FM is a continuous trouble free operational establishment and able to execute the orders those received from respected buyers and clients from any parts of the business globe as desired by the buyers.

Moreover, our company has 15 years of experience in producing a myriad of disposable plastics items. With this enormous efforts and significant contribution to the economy, Md. Gazi Tauhidur Rahman, the founder of the company has received the award of "Best Entrepreneur" in the year of 2018 from our honorable Prime Minister.

Plastic made Household, Toys & Furniture

Company Profile

ACI Premio Plastics, a trademark brand of Premiaflex Plastics Limited, is a strategic business unit of ACI Limited, one of Bangladesh's leading conglomerates. Since its launch in 2018, Premio has focused on delivering premium-quality plastic products, covering over 850 SKUs across Furniture, Toys, and Household categories. Its products are available nationwide through a robust distribution network across all 64 districts.

Toys Portfolio: ACI Premio is the pioneer of international-standard, locally manufactured toys in Bangladesh. Its flagship brand, Captain Toys, supports the physical and mental development of children. The Captain Bike, a standout product, is present in 1.5 million households. With six toy categories including ride-ons and electric bikes, Premio currently holds a 22% market share in the ride-on toy segment, aiming for 30% by 2025-26 through new product additions and strong marketing like the campaign 'Shishu Oporadhi', which reached 40 million+ people.

Furniture Portfolio: Contributing 56% of Premio's total sales, the Furniture portfolio includes Almirahs, Wardrobes, Chairs, Tables, and the innovative Kitchen Master. Premio introduced Bangladesh's first metal-reinforced plastic wardrobe and plastic Almirah. With a reputation for design innovation and a strong market presence, Premio holds a 12% market share, targeting 16% by 2025-26 through continuous innovation and superior customer service.

Plastic Baby Toys

Company Profile

The Aman Plastic Toys Industries, "Play, Learn & Grow", has started operation as a toys manufacturing venture known as "Aman Plastic" under the aegis of the group's first concern - the Aman Plastic Industries in 2010 by the magician of toys named Md. Aman Ullah in his age of 19. This project turned out to be a very successful one and had helped faster the growth of trust and dependency of the urban as well as rural parents in Bangladesh. Bangladesh's burgeoning population, coupled with a conspicuously lacking of local toys manufacture led to the landmark success of Aman Plastic.

Driven by the ramifications of this success, Aman Plastic geared up to invest in new fields, including manufacturing and trading. More enterprises were established in the early 2010s and during this period, Aman Plastic has over 06 major concerns located in Dhaka division of the country. The major concerns of the Aman Plastic are Aman Plastic Toys Industries, Aman Plastic Industries, Aman Plastic Industries, Aman Enterprise, among others.

The Aman Plastic has come a long way in reaching its goals by listening to client needs, learning real-time lessons from past projects, innovating its project implementation process. Through major investment undertakings in toys sectors, Aman Plastic has meaningfully contributed to the country's economic stability in financial and employment perspective. Now Aman Plastic is playing "Top One" position in toys manufacturing sector in Bangladesh beating the foreign toys market in Bangladesh and also earning foreign currency by exporting toys in India from 2019.

PVC Door, PVC Sheet, WPC Door, PVC Window Profiles, Decorative Partition Products, Plastic Garden Fencing, PVC/PU Synthetic Leather, PVC Super Clear Transparent Film, Soft PVC Mat

Company Profile

In 2007, Banga Building Material Ltd. (BBML), a sister concern of RFL, started manufacturing and marketing of RFL uPVC Door and uPVC Sheet. RFL uPVC Door is a high-tech, synthetic product that is used worldwide as a replacement of wooden doors.

RFL doors are durable, water-resistant, affordable and strong and are made in various colors and sizes to cater customer demand. RFL uPVC Sheet is a durable and water-resistant building material which is being used worldwide as a superior alternative of particle board, plain board, and melamine board and wood for making furniture, kitchen cabinet, false ceiling etc.

The competitive advantages of using sheets are easy to fit and bend, no need for burnish or paint, less weight, competitive pricing along with durability and water resistance. RFL is now producing uPVC sheet of varying sizes, width and color for use in different types of building needs.

Products & Services

Blender, Rice Cooker, Mixer Grinders and other Home Appliances

Company Profile

Soon after the Liberation War, Mohammed Idris Ahmed, a Dhaka University graduate, set up a general store named "Ahmed Trading" to sell a variety of daily necessity products. With time, this import-focused trader turned his attention to electronic items. By the early 1990s, he ventured into the home appliance business with just 24 units of only one product – a blender set under the brand name "Miyako." Fast forward to 2022, Miyako's production line consists of 450 products spread across 48 categories. Between 1999 and 2005, Mohammed Idris expanded Ahmed Trading – now known as Miyako Appliance Limited – by introducing electric ovens, rice cookers and microwave ovens under the Miyako brand.

By 2008, he handed over Miyako Appliance Limited to his eldest son – Dr Mohammad Naveed Ahmed. Miyako Appliance has a strong customer network through its distributors, dealers and resellers. Over the years, it has become a household name of almost all the families in Bangladesh due to its after sales service. We have become a leading name in this industry through our product quality, after sales service, sales network and affordable pricing.

Miyako's manufacturing wing Kinbo Manufacturing Industries Limited, established in 2012, produces Blender, Rice Cooker, Mixer Grinders under its "Proudly Made in Bangladesh" banner and assembles few other goods under "Proudly Assembled in Bangladesh".

UAV & Robotics

Company Profile

Narsingdi Science and Robotics Lab (NSRL) Founded in 2017, Narsingdi Science and Robotics Lab (NSRL) has been a pioneer in advancing robotics and drone technology in Bangladesh. Over the years, NSRL has grown into a nationally recognized innovation hub, dedicated to empowering the next generation of engineers, scientists, and technologists through cuttingedge research, real-world experimentation, and impactful inventions.

From smart automation to next-gen UAVs, our work spans across various domains in robotics and aeronautics — with a strong focus on surveillance systems, military-grade drones, and autonomous technologies. Our lab is proud to have nurtured some of the country's brightest talents and boldest ideas.

NSRL has been honored as the Best National Innovator two consecutive times at the highest level, a testament to our team's creativity, resilience, and drive for excellence. Beyond borders, we've earned multiple international medals and accolades, showcasing Bangladesh's innovation potential on the global stage.

With a clear mission to solve real-world problems through engineering and science, NSRL continues to push boundaries and inspire a future powered by intelligent machines.

Automotive Lead Acid Battery

Company Profile

Rahimafrooz was founded in 1954 as a pioneer in the Bangladeshi battery industry. Rahimafrooz Storage Power Business (RSPB) is the core business of the Group, with leadership in the local and some international markets. As the leading supplier of lead acid batteries in Bangladesh with the latest technology of batteries, RSPB serves the most extensive network of dealers and retailers.

It is the only company that has batteries to offer for every segment in the industry. RSPB produces a complete range of products ranging from 2.5 Ah to 3000 Ah, for applications primarily in Automotive, Inverters, Solar, Marine, Traction and Telecoms. With exports starting in 1992, GLOBATT, VOLTA, IGNUS, and DELTA have taken RSPB across global frontiers. RSPB enjoys a presence in over 70+ global markets, with domination in some key APAC, SAARC, and Middle Eastern markets.

Rahimafrooz had pioneered in bringing the conventional Dry Charge technology in automotive and Industrial in the 1960s, followed by Maintenance Free (MF) technology in 2009. RSPB continues to be the only MF battery manufacturer in Bangladesh and has continued to hold its pioneering position through recent technological developments including the Enhanced Flooded Batteries (EFB) for Start-Stop, OPzV for Industrial, and the completely sealed Valve Regulated Lead Acid (VRLA) batteries for both starting and deep cycle applications.
